

Coronavirus Disease 2019 (COVID-19)

ECDHD COVID-19 HOTLINE:
English/Spanish: 402.562.8960

Situation Report – Week 39 (Sept 20 – Sept 26)

Data curated by DHHS and ECDHD; current as of 05:00 2 Oct 2020

Highlights

- Beginning this week, the ECDHD situation reports will contain data from the complete, previous epidemiological week (Sunday through Saturday), rather than week-to-date numbers (Sunday through Wednesday). For example, today's report will contain all of the data for Epi Week 39 (Sep 20–Sep26) in addition to the latest case counts, while last week's report only contained partial data for Week 39 from (Sep 20-Sep23) and the latest case counts.
- The most current ECDHD data can be found at: <https://bit.ly/30tiYAK>
- There are currently five COVID-19 hospitalizations and additionally, four ICU beds being used in the health district.
- Nance County continues to have the largest population-adjusted leader in cases in Week 39.
- The pattern of COVID transmission continues to be known sources of person to person contact within the health district, outside classroom settings.
- The primary source of transmission identified within the health district is within households. ECDHD asks that those in both isolation (they are sick) or in quarantine (have been exposed to a known positive case) separate themselves from others in the home to avoid exposing or being exposed to household members. This includes wearing a mask at home and sleeping in a different area of the house. More information can be found here: <https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/steps-when-sick.html>
- One new death has been reported to the health district this week in Boone County, but has not been added to the official tally, pending review of the final death certificate.
- Good Neighbor Community Health Center will continue to offer Test Nebraska testing in Albion throughout the month of October.

SITUATION IN NUMBERS

Boone County

Total cases: 88
New cases (7 days): 15
New cases (14 days): 32
Deaths: 0
New deaths (7 days): 1 (pending)
Total incidence per 100k: 1,503
Week 39 incidence per 100k: 270
Overall % positive: 8.0%
Week 39 % positive: 7.5%

Nance County

Total cases: 51
New cases (7 days): 12
New cases (14 days): 29
Deaths: 0
New deaths (7 days): 0
Total incidence per 100k: 1,222
Week 39 incidence per 100k: 626
Overall % positive: 8.6%
Week 39 % positive: 40.7%

Colfax County

Total cases: 795
New cases (7 days): 28
New cases (14 days): 43
Deaths: 5
New deaths (7 days): 0
Total incidence per 100k: 7,200
Week 39 incidence per 100k: 215
Overall % positive: 33.5%
Week 39 % positive: 20.7%

Platte County

Total cases: 1,147
New cases (7 days): 104
New cases (14 days): 163
Deaths: 4
New deaths (7 days): 0
Total incidence per 100k: 3,123
Week 39 incidence per 100k: 216
Overall % positive: 12.4%
Week 39 % positive: 26.6%

Total Health District

Total cases: 2,081
New cases (7 days): 159
New cases (14 days): 267
Deaths: 9
New deaths (7 days): 1 (pending)
Total incidence per 100k: 1,503
Week 39 incidence per 100k: 270
Overall % positive: 14.7%
Week 39 % positive: 21.1%

Average Test Nebraska Result Turnaround: **64.5 hours**
Test Nebraska Result Turnaround (7-day avg.): **87.0 hours**

Figure 1. Positive cases by epidemiological week in Boone, Colfax, Nance, and Platte Counties.

Figure 2. Population-adjusted rate of incidence by epidemiological week (rate per 100,000 people).

Figure 3. Total and positive number of daily COVID-19 tests.

Figure 4. Seven-day average of confirmed cases within East Central District

Figure 5. Percentage of COVID positive cases by age group for the East Central Health District

Figure 6. Percentage of COVID positive cases by gender East-Central Health District

COVID RED: Severe COVID-19 Pandemic Outbreak

- Widespread community or regional transmission of COVID
- There is a significant increase in COVID positive cases OR percent positive cases which may potentially overwhelm the local healthcare system
- There is a significant increase in Flu-Like Symptoms and COVID-like syndromic cases which may potentially overwhelm the local healthcare system
- Hospitals are utilizing Surge Capacity
- There is an inadequate testing capacity for critical workers
- There is inadequate capacity to conduct investigation and contact tracing
- There are shortages of critical medical equipment or testing supplies
- There are PPE shortages impacting critical workers

General Public	Outside the Home – Work, Social, in Public	At Home
Physical Distancing	<ul style="list-style-type: none">• Stay at home unless essential personnel traveling for work, or general public acquiring medical care or food• Distance at least 6 feet from anyone outside the home• Work from home• No contact with others	<ul style="list-style-type: none">• No distancing for people without symptoms, unless they are under quarantine as a result of being exposed to someone who is infected• Self-isolation of symptomatic persons
Face Covering	<ul style="list-style-type: none">• Face coverings when outside of the home and near others	<ul style="list-style-type: none">• No face coverings for people without symptoms, unless they are under quarantine as a result of being exposed to someone who is infected• Face coverings for symptomatic people
Hand Washing	<ul style="list-style-type: none">• Frequently wash hands for at least 20 seconds, especially after touching high contact surfaces, sneezing/coughing/touching face, or before eating• Use hand sanitizer when handwashing is inaccessible or infeasible	<ul style="list-style-type: none">• Frequently wash hands for at least 20 seconds, especially after touching high contact surfaces, sneezing/coughing/touching face, or before eating
Illness Monitoring	<ul style="list-style-type: none">• If ill with Flu-like or COVID-like symptoms, Stay at Home even for essential personnel• Minimize contact with symptomatic people• Daily temperature checks at work	<ul style="list-style-type: none">• Daily temperature check• Continuously monitor for COVID-19 symptoms• Self-isolation of symptomatic persons• Contact healthcare provider if sick• Monitor the health of anyone in your home with COVID-like symptoms
Disinfecting	<ul style="list-style-type: none">• Avoid bare hand contact with any high touch surface• Use barrier such as paper towel or clothing when bare hand contact is unavoidable• Wash hands or apply sanitizer after touching high contact surfaces• Enhanced disinfection, especially for high contact surfaces (door/other handles, light switches, bathroom fixtures)	<ul style="list-style-type: none">• Avoid bare hand contact with any high touch surface• Use barrier such as paper towel or clothing when bare hand contact is unavoidable• Wash hands or apply sanitizer after touching high contact surfaces• Enhanced disinfection, especially for high contact surfaces (door/other handles, light switches, bathroom fixtures)
At-Risk or Vulnerable Population	For those over age 65, people with underlying health conditions, and other populations at heightened risk from COVID-19 <ul style="list-style-type: none">• Stay home• Rely on help for needs outside the home (groceries, medications, etc.)• Distance from those working outside of the home	

COVID ORANGE: Elevated COVID-19 Spread Risk

- There are increasing or high stable numbers of COVID positive cases OR percent positive cases due to community or regional spread
- There is an increase in Flu-Like Symptoms OR COVID like syndromic cases in the East Central Health District or regionally
- Clusters or outbreaks exist that are still likely in their early stages
- There is only enough testing available for symptomatic people
- ECDHD must rely on assistance to conduct investigation for new cases and associated and contact tracing OR ECDHD must assist adjacent jurisdictions to conduct investigation and contact tracing
- PPE supplies are only adequate for critical workers
- Critical medical equipment is in limited supply

General Public	Outside the Home – Work, Social, In Public	At Home
Physical Distancing	<ul style="list-style-type: none"> • Stay at home unless traveling for work, medical care, or food • Distance at least 6 feet from anyone outside the home • Work from home if possible • Individual outdoor activities such as walking, biking, etc. are acceptable • Smallest number of contacts feasible • No large gatherings or events, no more than 10 people 	<ul style="list-style-type: none"> • No distancing for people without symptoms, unless they are under quarantine as a result of being exposed to someone who is infected • Self-isolation of symptomatic persons • Outdoor activities with members of your household are acceptable
Face Covering	<ul style="list-style-type: none"> • Face coverings strongly recommended for anyone over 2 years old 	<ul style="list-style-type: none"> • No face coverings for people without symptoms, unless they are under quarantine as a result of being exposed to someone who is infected • Face coverings for symptomatic people
Hand Washing	<ul style="list-style-type: none"> • Frequently wash hands for at least 20 seconds, especially after touching high contact surfaces, sneezing/coughing/touching face, or before eating • Use hand sanitizer when handwashing is inaccessible or infeasible 	<ul style="list-style-type: none"> • Frequently wash hands for at least 20 seconds, especially after touching high contact surfaces, sneezing/coughing/ touching face, or before eating
Illness Monitoring	<ul style="list-style-type: none"> • If sick with Flu-like or COVID-like symptoms, Stay at Home • Minimize contact with symptomatic people • Daily temperature checks at work 	<ul style="list-style-type: none"> • Daily temperature checks • Monitor for COVID-like symptoms • Contact healthcare provider if sick • Monitor the health of anyone in your home with COVID-like symptoms
Disinfecting	<ul style="list-style-type: none"> • Avoid bare hand contact with any high touch surface • Use barrier such as paper towel or clothing when bare hand contact is unavoidable • Wash hands or apply sanitizer after touching high contact surfaces • Enhanced disinfection, especially for high contact surfaces (door/other handles, light switches, bathroom fixtures) 	<ul style="list-style-type: none"> • Enhanced disinfection, especially for high contact surfaces (door/other handles, light switches, bathroom fixtures)
At-Risk or Vulnerable Population	<p>For those over age 65, people with underlying health conditions, and other populations at heightened risk from COVID-19</p> <ul style="list-style-type: none"> • Stay home • Rely on help for needs outside the home (groceries, medications, etc.) • Distance from those working outside of the home 	

COVID Yellow: Moderate Risk of COVID-19 Spread

- There is a downward trajectory in numbers of COVID positive cases OR percent positive cases due to community or regional spread
- There is a downward trajectory in levels of Flu-Like Symptoms OR COVID like syndromic cases in East Central Health District County or regionally
- There is limited community spread within East Central Health District or regionally
- COVID has a small impact on the local healthcare system capacity
- PPE supplies are adequate for critical workers and community needs
- Rapid COVID testing is available for all suspected cases and focused asymptomatic surveillance.
- ECDHD is able to conduct investigation and contact tracing for new cases and associated contacts without assistance
- Critical medical equipment is readily available

General Public	Outside the Home – Work, Social, In Public	At Home
Physical Distancing	<ul style="list-style-type: none"> • Consider staying at home most of the time, with caution for non-essential travel and work • Distance at least 6 feet from anyone outside the home • Work from home if possible • Individual outdoor activities such as walking, biking, etc. are acceptable • Cautious expansion of interactions with others, outdoor activities preferred • Gatherings only with modifications for COVID-19 • Events only as guided by ECDHD 	<ul style="list-style-type: none"> • No distancing for people without symptoms, unless they are under quarantine as a result of being exposed to someone who is infected • Self-isolation of symptomatic persons • Outdoor activities with distancing are acceptable.
Face Covering	<ul style="list-style-type: none"> • Face coverings strongly recommended for anyone over 2 years old 	<ul style="list-style-type: none"> • No face coverings for people without symptoms, unless they are under quarantine as a result of being exposed to someone who is infected • Face coverings for symptomatic people
Hand Washing	<ul style="list-style-type: none"> • Frequently wash hands for at least 20 seconds, especially after touching high contact surfaces, sneezing/coughing/touching face, or before eating • Use hand sanitizer when handwashing is inaccessible or infeasible 	<ul style="list-style-type: none"> • Frequently wash hands for at least 20 seconds, especially after touching high contact surfaces, sneezing/coughing/ touching face, or before eating
Illness Monitoring	<ul style="list-style-type: none"> • If ill with Flu-like or COVID-like symptoms, Stay at Home • Minimize contact with symptomatic people • Daily temperature checks at work 	<ul style="list-style-type: none"> • Monitor for COVID-like symptoms
Disinfecting	<ul style="list-style-type: none"> • Avoid bare hand contact with any high touch surface • Use barrier such as paper towel or clothing when bare hand contact is unavoidable • Wash hands or apply sanitizer after touching high contact surfaces • Enhanced disinfection, especially for high contact surfaces (door/other handles, light switches, bathroom fixtures) 	<ul style="list-style-type: none"> • Enhanced disinfection, especially for high contact surfaces (door/other handles, light switches, bathroom fixtures)
At-Risk or Vulnerable Population	<p>For those over age 65, people with underlying health conditions, and other populations at heightened risk from COVID-19</p> <ul style="list-style-type: none"> • Stay home • Rely on help for needs outside the home (groceries, medications, etc.) • Distance from those working outside of the home 	

COVID Green: Low Risk of COVID-19 Spread

- Minimal cases of COVID-19 within the community.
- COVID-19 has minimal impact on local healthcare system
- Viral testing is readily available
- There are effective treatment modalities for COVID-19
- PPE is easily obtainable through standard supply chains

General Public	Outside the Home – Work, Social, In Public	At Home
Physical Distancing	<ul style="list-style-type: none"> • No distancing, resumption of normal work and community life • Resume normal travel with considerations of COVID activity in destinations 	<ul style="list-style-type: none"> • No distancing for people without symptoms, unless they are under quarantine as a result of being exposed to someone who is infected • Self-isolation of symptomatic persons
Face Covering	<ul style="list-style-type: none"> • Face coverings suggested when unable to distance • Face coverings for symptomatic people 	<ul style="list-style-type: none"> • No face coverings for people without symptoms, unless they are under quarantine as a result of being exposed to someone who is infected • Face coverings for symptomatic people
Hand Washing	<ul style="list-style-type: none"> • Frequently wash hands for at least 20 seconds, especially after touching high contact surfaces, sneezing/coughing/touching face, or before eating • Use hand sanitizer when handwashing is inaccessible or infeasible 	<ul style="list-style-type: none"> • Frequently wash hands for at least 20 seconds, especially after touching high contact surfaces, sneezing/coughing/ touching face, or before eating
Illness Monitoring	<ul style="list-style-type: none"> • If ill with Flu-like or COVID-like symptoms, Stay at Home • Minimize contact with symptomatic people 	<ul style="list-style-type: none"> • Be aware of COVID-like symptoms • Contact medical care provider if you have COVID-like symptoms
Disinfecting	<ul style="list-style-type: none"> • Increased awareness of germ transmission through high contact surfaces • Incorporation of COVID-19 disinfection practices for high touch surfaces • Avoid bare hand contact with any high touch surface • Use barrier such as paper towel or clothing when bare hand contact is unavoidable • Wash hands or apply sanitizer after touching high contact surfaces • Normal disinfection, especially for high contact surfaces (door/other handles, light switches, bathroom fixtures) 	<ul style="list-style-type: none"> • Increased awareness of germ transmission through high contact surfaces • Normal disinfection practices, with consideration for high contact surfaces (door/other handles, light switches, bathrooms)
At-Risk or Vulnerable Population	<p>For those over age 65, people with underlying health conditions, and other populations at heightened risk from COVID-19</p> <ul style="list-style-type: none"> • You do not have to stay home at all times, but should continue physical distancing when possible in public settings. • Cautious expansion of interactions with others, reengage in small social settings, outdoor activities preferred • Avoid large group settings and events with many people 	

STRATEGIC OBJECTIVES

ECDHD's strategic objectives for this response are to:

- Interrupt human-to-human transmission including to reduce secondary infections among close contacts and health care workers, prevent transmission amplification events, and prevent further spread.*
- Identify, isolate and care for patients early, including to provide optimized care for infected patients.
- Communicate critical risk and event information to all communities and counter misinformation.
- Minimize social and economic impact through multisectoral partnerships.

*This can be achieved through a combination of public health measures, such as rapid identification, diagnosis and management of the cases, identification and follow-up with contacts, partnership in infection prevention and control in health care settings, implementation of health measures for travelers, raising awareness in the population and risk communication.

RECOMMENDATIONS AND ADVICE FOR THE PUBLIC

Get the facts on COVID-19 from reliable sources to help you accurately determine your risks so that you can take reasonable precautions. Seek guidance from your healthcare provider, ECDHD, DHHS, CDC, or your employer for accurate information on COVID-19.

It is important to be informed of the situation and take appropriate measures to protect yourself and your family. For most people, COVID-19 infection will cause mild illness; however, it can make some people very ill and, in some people, it can be fatal. Older people, and those with pre-existing medical conditions (such as cardiovascular disease, chronic respiratory disease or diabetes) are at greater risk for severe disease. Stay up to date with the latest information from the CDC [here](#).
