

Coronavirus Disease 2019 (COVID-19) Situation Update – 26 June 2020

Data curated by Johns Hopkins CSSE, including DHHS, WHO, CDC, ECDC, NHC, and DXY and current as of 6:55 27 June 2020

Highlights

- Fourteen-day totals and positivity rates for the health district continue to improve.
- Several states—including Arizona, California, Florida, and Texas—have experienced a resurgence of new cases as directed health measures relax nation-wide.
- Travel to these domestic hot spots poses the greatest threat to Nebraskans as conditions continue to improve in the state. Residents should limit travel to areas of COVID resurgence.

SITUATION IN NUMBERS

Boone County

- Cumulative cases: 7
- Cumulative cases/100,000 pop: 131
- Recovered cases: 7
- Deaths: 0
- Positivity rate*: 3.5%

Nance County

- Cumulative cases: 4
- Cumulative cases/100,000 pop: 112
- Recovered cases: 4
- Deaths: 0
- Positivity rate: 2.7%

Colfax County

- Cumulative cases: 665
- Cumulative cases/100,000 pop: 6,264
- Recovered cases: 652
- Deaths: 4
- Positivity rate: 47.4%

Platte County

- Cumulative cases: 659
- Cumulative cases/100,000 pop: 2,005
- Recovered cases: 645
- Deaths: 3
- Positivity rate: 22.5%

STRATEGIC OBJECTIVES

ECDHD's strategic objectives for this response are to:

- Interrupt human-to-human transmission including to reduce secondary infections among close contacts and health care workers, prevent transmission amplification events, and prevent further spread.*
- Identify, isolate and care for patients early, including to provide optimized care for infected patients.
- Communicate critical risk and event information to all communities and counter misinformation.
- Minimize social and economic impact through multisectoral partnerships.

*This can be achieved through a combination of public health measures, such as rapid identification, diagnosis and management of the cases, identification and follow-up with contacts, partnership in infection prevention and control in health care settings, implementation of health measures for travelers, raising awareness in the population and risk communication.

RECOMMENDATIONS AND ADVICE FOR THE PUBLIC

Get the facts on COVID-19 from reliable sources to help you accurately determine your risks so that you can take reasonable precautions. Seek guidance from your healthcare provider, ECDHD, DHHS, CDC, or your employer for accurate information on COVID-19.

It is important to be informed of the situation and take appropriate measures to protect yourself and your family. For most people, COVID-19 infection will cause mild illness; however, it can make some people very ill and, in some people, it can be fatal. Older people, and those with pre-existing medical conditions (such as cardiovascular disease, chronic respiratory disease or diabetes) are at greater risk for severe disease. Stay up to date with the latest information from the CDC [here](#).
